
Neutronics Solutions Proudly Sponsors Open-wheel Series Formula 1600 Canadian Race Team

Autodesk Silver Manufacturing VAR Supports Automotive Innovations On and Off the Track

OTTAWA, Ontario – September 16, 2010 – Neutronics Solutions, a Canadian representative of semiconductor components, embedded systems, solid-state lighting solutions, and Digital Prototyping mechanical design software, is proud to announce its sponsorship of the Canadian Formula 1600 Open-wheel Series Team. Neutronics Solutions is the title sponsor of the Simtec Canadian Racing team, and its driver Jonathan Labbee, who took his third podium win in Montreal, Quebec, coming in third place at the Masters Series on June 13, 2010. Labbee also placed third in the recent NASCAR Napa event in Montreal in August.

“As the President of Neutronics Solutions and an avid racing fan, it was thrilling to see Jonathan and his diligent racing crew realize another podium win this month at the Masters Series,” said David Stubbs, president of Neutronics Solutions. “My company is not only an on-track supporter of racing, but we also offer Autodesk automotive manufacturing solutions, where mechanical design features and functionalities are a critical element to efficient and innovative automotive design.”

“We are proud to see our Neutronics Solutions – a Silver Manufacturing Autodesk VAR - actively supporting the sport of racing,” said Ed Martin, Senior Industry Manager, Automotive and Transportation at Autodesk. “At Autodesk we are passionate about automotive innovations, and our software solutions support conceptual design creativity, intelligent mechatronic systems design, as well as integrated simulation and analysis.”

Request a Quote ... Qualify to Win an Apple iPad

For the months of September and October 2010, Neutronics Solutions is offering the opportunity to win a new Apple iPad. To qualify to win an Apple iPad, contact a Neutronics Solutions sales representative and request a quote for your next 2D or 3D CAD software solution investment. To learn more and to qualify for an Apple iPad, contact autodesk@neutronics.ca.

About Neutronics Solutions

Neutronics Solutions represents an elite group of international companies, offering antenna solutions, semiconductor components, embedded systems, solid-state lighting solutions, electronics design and Digital Prototyping mechanical design software as well as design services. Neutronics Solutions is an Ottawa-based company with sales offices in Toronto, Montreal and Vancouver. www.neutronics.ca
