

Infineon Technologies has the strongest growth rate among the 10 largest semiconductor manufacturer, automotive, industrial, computer, security and chip card markets.

Automotive: Power Semiconductors, Protected Switches, ASSP, Sensors, Micros.
Industrial: Mosfets, IGBT, ESD Diodes, Micros, Sensors, Wireless, ASK/FSK
Security: Chip card Secure Micros, Tags.
Wireless: LDMOS, LNA, ESD Diodes, Rf Discretes.

TriQuint Semiconductor Supplier of high-performance modules and components to the world's leading communications companies. Diverse markets include wireless handsets, base stations, broadband communications, military and foundry services. Uses advanced processes that include gallium arsenide (GaAs), surface acoustic wave (SAW) and bulk acoustic wave (BAW) technologies.

OSRAM Opto Semiconductors The world's 2nd largest manufacturer of optosemiconductors for the lighting, sensor and visualization sectors. With its corporate headquarters in Regensburg, Germany and its development and manufacturing sites in San Jose, California and Penang, Malaysia, the company is a competence center for optical solutions based on semiconductor technology.

SMSC is a global supplier of semiconductor solutions that distribute video, sound, photos and data in the home, automobile, office and factory. SMSC develops semi-custom and application specific standard products (ASSPs) that allow users to access or transfer their digital assets with convenience and speed. Products include USB hubs, card readers and mass storage devices, Input/Output (I/O).

Cyoptics is an industry leader in the design, development and manufacturing of next-generation optical engines that are five times smaller than the current industry standard components. High-volume production is enabled through a highly flexible, "nano-tech" capable robotic manufacturing process that delivers high uniformity and low cost.

Johanson's product focused operating units are well recognized as leading suppliers of Multilayer Ceramic Capacitors and Passive Ceramic Components to computer, telecommunication, contract manufacturing, industrial, automotive and military markets.

Johanson Dielectrics - Surface Mount Ceramic Capacitors
Johanson Technology - High Frequency Ceramic Solutions
Advanced Monolithic Creamics - Advanced Monolithic Capacitors

Lantiq offers a broad portfolio of highly integrated, end-to-end solutions targeting Next Generation Networks and the Digital Home. These advanced SoC (system-on-chip) solutions address a wide variety of technologies, including VDSL, ADSL2+, SHDSL and VoIP, and have allowed Lantiq to become the number one supplier of Access Network Integrated Circuits.
