

Neutronics Solutions to Represent 3D PCB Footprint Designer Simplified Solutions to Enhance Altium Designer Functionality

OTTAWA, Ontario – July 6, 2010 - Neutronics Solutions, a Canadian representative of semiconductor components, embedded systems, solid-state lighting solutions, and digital prototyping CAD and electronic design software, has added Simplified Solutions to the elite group of companies it represents. Simplified Solutions offers a new 3D Library of common PCB footprints in STEP format for ECAD and MCAD users. The company also provides design services to build 3D PCB components. Neutronics Solutions added Simplified Solutions' Altium Designer specific software to its product offering in May 2010.

"Simplified Solutions brings a comprehensive 3D components library to enhance the Altium Designer product offering," said David Stubbs, President of Neutronics Solutions. "We are excited to bring this cohesive ECAD offering to our customers, from these two world-class software design companies."

Using Simplified Solutions 3D PCB footprint software, Altium Designer users can download and import the 3D STEP Library Components into designs to create 3D PCBs. These 3D boards can be exported from Altium Designer via STEP. Mechanical Engineers can now view and work with accurate 3D PCBs in MCAD.

In addition to our new STEP Library for Altium Users, legacy 3D PCB Library Components are also available in prt format for Pro/Engineer Users, and STEP and IGES for MCAD users of CAD Packages such as Solidworks, Circuitworks, Catia, and Autodesk Inventor.

"At Simplified Solutions, our goal is to help engineers develop more detailed 3D PCBs in CAD, with specific customization for the Altium Designer software solution," said Keith Richman, President of Simplified Solutions. "Our 3D PCB Component Libraries, Tools and Services have helped many companies create 3D Circuit Boards and develop products faster with fewer PCB geometry design errors."

Simplified Solutions July Promotion - Only from Neutronics Solutions

For the month of July Simplified Solutions is offering the following discounted ECAD & 3D Step Library PCB Footprint designer solution:

- ***New Altium Designer Customers:*** Unlimited downloads for one year when purchased in combination with new Altium Designer licenses (\$680 – 60% below retail price)
- ***Existing Altium Designer Customers:*** Unlimited downloads for one year for customers with existing Altium Designer licenses (\$850 – 50% below retail price)

For more information or to place your order contact altium@neutronics.ca.

About Neutronics Solutions

Neutronics Solutions represents an elite group of international companies, offering antenna solutions, semiconductor components, embedded systems, solid-state lighting solutions, electronics design and digital prototyping CAD software as well as design services. Neutronics is an Ottawa-based company with sales offices in Toronto, Montreal and Vancouver.

About Simplified Solutions

Simplified Solutions helps mechanical and electrical engineers develop more detailed 3D PCBs in CAD. We offer 3D PCB Component Libraries, Tools and Services, which have helped many companies, create 3D circuit boards and develop products faster with fewer PCB geometry design errors. www.simplifiedsolutionsinc.com
